

## INFORMATION TECHNOLOGY CAPABILITIES

**Today's changing technology and dynamic work environment is placing a tremendous premium on selecting information technology (IT) solutions that properly align with business strategic goals and objectives.** Public and private organizations alike are increasingly called upon to do more with less. Federal organizations are confronting a new reality of reduced budgets and greater scrutiny concerning their ability to demonstrate that agency investments deliver high performance and quality results. For their part, CIOs are faced with a withering array of issues, challenges, and also opportunities to leverage technology in promoting organizational change and maximizing Agency performance.

Since 1996 Romanyk Consulting Corp. (RCC) has stayed abreast of the ever-evolving technology environment and we pride ourselves in delivering value-added technology solutions and services that are tailor made to address our clients' unique requirements. We understand the critical importance of making the right decisions about how to invest your technology dollars and we can offer you a broad range of IT support services that will help ensure that outcome.

RCC is not just another IT consulting firm. We will forge a partnership with you to gain a thorough understanding of your real concerns and most prominent issues. Focusing on what matters we will help you and your organization realize your vision for significant operational and organizational improvement for today and into the future.

## A CASE STUDY

To support its research proposal budget function, the US Army Medical Research Institute of Infectious Diseases (USAMRIID) was relying upon a laborious spreadsheet-based process, which was inefficient, time-consuming and prone to error. In response, RCC carefully analyzed the existing USAMRIID budget function, identified improvements, and employed process modeling to standardize the results. To address the automated support requirement, **RCC developed the Budget Planning Tool (BPT) to alleviate bottlenecks in the overall budgeting process.** Today, the BPT continues to assist USAMRIID researchers and division chiefs in creating multi-year budget projections and provides a central information store for use by the Commander and his senior management.

## WANT TO KNOW MORE ABOUT BPT?

The Budget Planning Tool developed by Romanyk Consulting **is Government-owned off-the-shelf software (GOTS) and is available to agencies across the Federal government.** The BPT architecture lends itself to simple configuration and modification that could make it an integral part of most integrated budget solutions. If you think that the BPT might be a fit for your organization, let us know – we would welcome the chance to provide you with all of the details! What our clients say about us For RCC, client satisfaction is of the utmost importance. What it means to us is doing quality work, and meeting client expectations, as well as contract requirements.

Here's what our clients have said about Romanyk Consulting Corporation:

“ **Given what I know today about the contractor's ability to perform in accordance with this contract or order's most significant requirements, I would recommend them for similar requirements in the future ... They are very knowledgeable and have a good understanding of VA requirements. Individuals are accommodating, attentive to detail, a quality product. Highly recommended because of the quality of work and individuals involved in the process.** ”
